**US WW II M4, M4A1 Sherman medium tank** Michael Franz 2005

**Modelling the US Army M4 (75mm) Sherman Medium Tank** Steven J. Zaloga 2012-04-20 The Sherman was the most widely used Allied tank of World War II and was built in larger numbers than all German tanks combined. There was also a huge number of variants, powered by different engines, and manufactured with different types of hulls and turrets. This book presents an expert guide to modelling the 75mm gun versions used by the US Army in the ET0, in 1/35 and 1/48 scale. The projects featured include an early M4A1 from Operation Husky (July 1943), an intermediate M4 during Operation Cobra (August 1944), an M4 mine-roller in the Ardennes (January 1945), and a M4A3 during Operation Grenade (February 1945).  
**The M4 Carbine** Chris McNab 2021-03-18 The M4 carbine has become one of the defining military firearms of the late 20th and early 21st centuries. Developed as a fusion of the XM177E2 Colt Commando and the M16A2 assault rifle, the M4 offered a more convenient battlefield firearm than the full-length M16 variants, and the US Army adopted it as the standard infantry weapon in the 1990s. Today, military and law-enforcement personnel of more than 60 countries have adopted either the M4 or the M4A1 variant, both of which have been tested and proven in major combat operations worldwide. This study describes the development process in detail, from production of the first XM4 prototypes in 1984 through numerous modified types until it emerged into official use as the M4 in 1994. The M4 offered a weapon that was 11b lighter and 6in shorter than the standard M16A2, yet could still deliver precision semi-auto and full-auto firepower up to an effective range of 500m. Over time, its capabilities have been enhanced by the M4A1 modifications plus an extensive range of tactical accessories, including optical day/night sights, laser/infrared designators, under-barrel grenade launchers and shotgun modules, foregrips, furniture options, mounting rails, and sound suppressors. Numerous M4/M4A1 combat operations are investigated to reveal why the weapon has received such high levels of approval by front-line combat troops, not only in Afghanistan and Iraq, where the M4/M4A1 has been intensively combat-tested, but also in contexts such as Colombia, India, Israel, and the Philippines. Profusely illustrated with photographs and artworks, and drawing its research from the latest declassified documents, this is a complete guide to one of the most important and widely distributed tactical infantry weapons of the last quarter-century.

**Sherman Tank Vol. 1** David Doyle 2018-08-28 This book documents the development and production of the M4A1 through its many variations, as well as its combat use around the globe. Produced by Lima Locomotive Works, Pressed Steel Car

Company, and Pacific Car and Foundry, the M4A1 was the first of the famed Sherman tanks and preceded the welded-hull M4 into production. Powered by a nine-cylinder, air-cooled radial engine, the M4A1 fought in North Africa with both US and British forces, across northwestern Europe, and on Pacific Islands with both the Army and the Marines, serving well into the 1950s. The evolving design went through three major hull designs, multiple turret designs, and armament with either a 75 mm or 76 mm gun--all of which are detailed in this book. Extensive archival photographs are augmented by stunning color images of preserved tanks, taking the reader around and inside this famed warhorse. Part of the Legends of Warfare series.

**Tm 9-1005-319-10 Operator's Manual for Carbine, 5.56 Mm, M4a1** Department of Department of Defense 2017-06-27 This manual provides operation and maintenance instructions for the M16A2, M16A3, M16A4 Rifles, M4 and M4A1 Carbines. These weapons are lightweight, gas-operated, air-cooled, magazine-fed. shoulder-fired weapons that can be fired in either automatic, three-round bursts, or semiautomatic. The purpose of the weapons is to provide personnel an offensive/defensive capability to engage targets in the field. The adapter rails allows the operator the capability to mount various accessories on to the M16A4 Riffle and the M4/M4A1 Carbines. When a procedure is common to M16 rifle and M4 Carbine, ONLY the M16A2 configuration will be depicted. If a procedure is not common to both -weapons, the procedure will be incorporated and the weapon will be identified. If your weapon is configured with adapter rails, refer to the appropriate appendices in this manual for operation and maintenance procedures for the adapter rails.

**M5-4 (E12-7R1) Mechanized Flame Thrower Installed in M4A1 Or M4A3 Medium Tanks** STANDARD OIL DEVELOPMENT CO ELIZABETH NJ. 1945 Under contract OEMsr-390 and at the request of Chemical Warfare Service, the Standard Oil Development Company undertook the development and design of the Mechanized Flame Thrower E12-7R1 which was later standardized as the M5-4. Much of the development work had been completed in the design of the earlier Model Q prototype, the Navy Mark 1 the E7-7 (M5A1 light tank), and the R7-LVT-A1 (amphibious tank) units, but additional improvements were developed and tested under the M5-4 assignment. Acting as engineering consultants for Chemical Warfare Service, and with the guidance and cooperation of Chemical Warfare Service-Technical Division, Headquarters A.S.F., and the New Developments Division, the assignment was carried out in close cooperation with the C.W.S. prime contractor, the M.W. Kellogg Company, and their subcontractor, the Lecourtenay Company. Initiated in August, 1944, this assignment also included the inspection and testing of the first twenty units, which were completed in May, 1945, establishing inspection procedures for large scale production, training of two U.S. Army instructor teams, issuing operating and maintenance manuals, and providing a field consultant under O.F.S. in the theater of operations.
