Early American Sharon Core 2012 In 2007, American photographer Sharon Core (born 1965) encountered the work of the early nineteenth-century American still-life painter Raphael Peale (1774-1825). Peale's images of fruit, cakes and vegetables are famed for their uncanny realism, and they inspired Core to undertake a series of photographs titled Early American, a brilliant exploration of trompe l'oeil's relationship to photography, and of photography's relationship to the past. Core replicates as closely as possible the subject matter, lighting and compositional characteristics of Peale's paintings. She describes an extraordinarily intensive preparation for the project, researching and acquiring period porcelain and glass and growing, from heirloom seeds, varieties of fruits and vegetables that were in existence in the early nineteenth century. "Through these efforts," she writes, "I hoped to achieve a mirroring of Peale's painstaking painting process, and the themes that lie under their surfaces." This volume reproduces the 31 images comprising this ambitious enterprise.

Bioinspiration, Biomimetics, and Bioreplication Raúl J. Martín-Palma 2011 Proceedings of SPIE present the original research papers presented at SPIE conferences and other high-quality conferences in the broad-ranging fields of optics and photonics. These books provide prompt access to the latest innovations in research and technology in their respective fields. Proceedings of SPIE are among the most cited references in patent literature. *Virtual Space* Lars Qvortrup 2011-06-28 Containing the edited research papers resulting from an ambitious, cross-disciplinary research project, this volume examines the spatiality of virtual inhabited 3D worlds - virtual reality and cyberspace. (Three other volumes look at Interaction, Staging and Methodology.) It is about the communication spaces emerging at the Internet and supported by special 3D interfaces. It is also about the virtual spaces created by virtual reality hardware (CAVEs, panoramic screens, head mounted display systems etc.) and software. Virtual Space: Spatiality in Virtual Inhabited 3D Worlds is interdisciplinary. It deals with philosophical, psychological, communicational, technological and aesthetic aspects of space. While philosophy raises the question concerning the ontology of space - what is space - psychology deals with our perception of space. Communication theory looks at the way in which space supports communication (i.e. that space is a medium for communication), and finally aesthetic analyses exemplify the use of virtual space in virtual cities, in museums and in art.

The Oldest Living Things in the World Rachel Sussman 2014-06-03 The Oldest Living Things in the World is an epic journey through time and space. Over the past decade, artist Rachel Sussman has researched, worked with biologists, and traveled the world to photograph continuously living organisms that are 2,000 years old and older. Spanning from Antarctica to Greenland, the Mojave Desert to the Australian Outback, the result is a stunning and unique visual collection of ancient organisms unlike anything that has been created in the arts or sciences before, insightfully and accessibly narrated by Sussman along the way. Her work is both timeless and timely, and spans disciplines, continents, and millennia. It is underscored by an innate environmentalism and driven by Sussman's relentless curiosity. She begins at "year zero," and looks back from there, photographing the past in the present. These ancient individuals live on every continent and range from Greenlandic lichens that grow only one centimeter a century, to unique desert shrubs in Africa and South America, a predatory fungus in Oregon, Caribbean brain coral, to an 80,000-year-old colony of aspen in Utah. Sussman journeyed to Antarctica to photograph 5,500-year-old moss; Australia for stromatolites, primeval organisms tied to the oxygenation of the planet and the beginnings of life on Earth; and to Tasmania to capture a 43,600-year-old self-propagating shrub that's the last individual of its kind. Her portraits reveal the living history of our planet—and what we stand to lose in the future. These ancient survivors have weathered millennia in some of the world's most extreme environments, yet climate change and human encroachment have put many of them in danger. Two of her subjects have already met with untimely deaths by human hands. Alongside the photographs, Sussman relays fascinating – and sometimes harrowing – tales of her global adventures tracking down her subjects and shares insights from the scientists who research them. The oldest living things in the world are a record and celebration of the past, a call to action in the present, and a barometer of our future. *Setting Sun* Anne Tucker 2006 Epic in scope, intimate in detail, heartbreaking in its human drama, *Former People* is the first book to recount the history of the nobility caught up in the maelstrom of the Bolshevik Revolution and the creation of Stalin's Russia. It is a book filled with chilling tales of looted palaces, burning estates, of desperate flights in the night from marauding bands of thugs and Red Army soldiers, of imprisonment, exile, and execution. It is the story of how a centuries'-old elite famous for its glittering wealth, its service to the empire, its promotion of the arts and culture, was dispossessed and destroyed along with the rest of old Russia. Drawing on the private archives of two great families – the Sheremetovs and the Goltsyns – it is also a story of survival and accommodation, of how many of the tsarist ruling class, so-called 'former people', managed to find a place for themselves and their families in the hostile world of the Soviet Union. It reveals, too, how even at the darkest depths of the terror, daily life went on - men and women fell in love, children were born, friends gathered. Ultimately, *Former People* is a testament to the resilience of the human spirit.

Japan's Castles Oleg Benesch 2019-05-31 An innovative examination of heritage politics in Japan, showing how castles have been used to re-invent and recapture competing versions of the pre-imperial past and project possibilities for Japan's future. Oleg Benesch and Ran Zwigenberg argue that Japan's modern transformations can be traced through its castles. They examine how castle preservation and reconstruction campaigns served as symbolic ways to assert particular views of the past and were crucial in the making of an idealized premodern history. Castles have been used to craft identities, to create and erase memories, and to symbolically join tradition and modernity. Until 1945, they served as physical and symbolic links between the modern military and the nation's premodern martial heritage. After 1945, castles were cleansed of military elements and transformed into public cultural spaces that celebrated both modernity and the pre-imperial past. What were once signs of military power have become symbols of Japan's idealized peaceful past.

Ōsaka Archaeology Richard Pearson 2016-05-31 Ōsaka, now a city of 19 million inhabitants, was the economic powerhouse of Japan for two thousand years and remains an important international center. In an unusual archaeological treatment of regional long-term history, Richard Pearson proposes that a kind of entrepreneurial mentality motivated leaders to expand the economy through projects of all kinds. He summarizes results of decades of Japanese intensive archaeological study of these projects and introduces some local museums conserving and interpreting cultural heritage in the face of overwhelming urbanization. The Ōsaka Plain was the scene of vigorous Palaeolithic and Jōmon hunting and gathering communities and large agricultural villages during the Yayoi Period, and was the political center of Japan for parts of the Kofun, Asuka and Nara Periods. In the 5th century AD some of the largest burial mounds in the world were built there. Later it was an area of rich and powerful manors in the Heian and Kamakura Periods. At the end of the Chūsei (Medieval) Period, the city of Sakai emerged as the financial center of Japan, and Ōsaka Castle briefly dominated the region. Working in tandem with the adjacent Nara and Kyōto Basins, Ōsaka was a center of innovation and economic, social, and cultural exchange between the Japanese Islands and coastal Asia.

Poet Singing (the Flowering Sheets) Jim Dine 2008 American Pop pioneer Jim Dine was asked by Los Angeles' Getty Museum in 2007 to produce the first contemporary project for the Getty Villa in Malibu by responding in some way to its renowned antiquities collection. Dine was drawn to the collection's ancient Greek sculptures and was given a room in the Villa for which he created three new monumental wood sculptures that he painted brightly in the Hellenistic tradition. Dine also wrote a long poem, which he installed alongside the sculptures, on the gallery wall. Jim Dine: Poet Singing (The Flowering Sheets) documents the entire process with photographs by Dine, Diana Michener and Gerhard Steidl. Jim Dine was born in Cincinnati, Ohio, in 1935. He came to prominence in New York in the 1960s with Happenings that he orchestrated along with Claes Oldenbourg and Allan Kaprow.

The Landscape of Contemporary Infrastructure Kelly Shannon 2010 Around the globe the importance of infrastructure as the motor of economic development rising owing to increasing mobility and the need to make urban territories accessible. As a result, infrastructure networks are among the most complex and significant design tasks today. This book investigates how the design of infrastructure actively influences the organization of the inhabited landscape. Works of infrastructure are analyzed as footprints of civilization, as physical presence, as transformers of perception, and as new vessels of collective life. The authors identify these characteristics, together with the conditions that influence them, and suggest a typology of design attitudes as revealed in recent practice around the world. Each chapter is illustrated with key works by some of the world's most inspiring designers, including Vito Acconci, Paul Andreu, Bentheim Crowell, Dietmar Feichtinger, Diller Scofidio + Renfro, Terry Farrell, Norman Foster, Nicholas Grimshaw, Antoine Grumbach, Zaha Hadid, Arata Isozaki, Bruno Mader, Maxwan, Montgomery Sissam, OMA, Tonkin Zulaikha Greer, UN Studio, and Zwarts & Jansma. The authors demonstrate how the combined creative potential of architecture, landscape architecture, and urban design is essential to putting into place an efficient, modern infrastructure. The result is an indispensable instrument for everyone involved in the design of infrastructure, and for all observers of the contemporary city. *Evaluating User Experience in Games* Regina Bernhaupt 2010-04-12 It was a pleasure to provide an introduction to a new volume on user experience evaluation in games. The scope, depth, and diversity of the work here is amazing. It attests to the growing popularity of games and the increasing importance developing a range of theories, methods, and scales to evaluate them. This evolution is driven by the cost and complexity of games being developed today. It is also driven by the need to broaden the appeal of games. Many of the approaches described here are enabled by new tools and techniques. This book (along with a few others) represents a watershed in game evaluation and understanding. The eld of game evaluation has truly "come of age". The broader eld of HCI can begin to look toward game evaluation for fresh, critical, and sophisticated thi- ing about design evaluation and product development. They can also look to games for groundbreaking case studies of evaluation of products. I'll brie y summarize each chapter below and provide some commentary. In conclusion, I will mention a few common themes and offer some challenges. Discussion In Chapter 1, User Experience Evaluation in Entertainment, Bernhaupt gives an overview and presents a general framework on methods currently used for user experience evaluation. The methods presented in the following chapters are s- marized and thus allow the reader to quickly assess the right set of methods that will help to evaluate the game under development.

Transforming Landscapes Françoise Fromont 2020-02-24 Michel Desvigne is the most renowned French landscape architect in the world. Based in Paris, he has held guest professorships at such distinguished institutions as the Architectural Association in London and Harvard University. Desvigne's projects have a strong strategic and conceptual component. Urban infrastructure projects play a major role, and emphasize the urban planning and design expertise evident in his landscape architecture. The book documents ten of Devigne's major projects from France, the US, Spain and Qatar, in which he is responsible not only for the landscape architecture, but for coordination of the entire project. How can such highly complex projects be realized? What does the intellectual thought process look like? What specific problems arise in their realization?

Outcasts of Empire Paul D. Barclay 2017-10-24 A free ebook version of this title is available through Luminos, University of California Press's Open Access publishing program. Visit www.luminosoa.org to learn more. Outcasts of Empire unveils the causes and consequences of capitalism's failure to "batter down all Chinese walls" in modern Taiwan. Adopting micro- and macrohistorical perspectives, Paul D. Barclay argues that the interpreters, chiefs, and trading-post operators who mediated state-society relations on Taiwan's "savagge border" during successive Qing and Japanese regimes rose to prominence and faded to obscurity in concert with a series of "long nineteenth century" global transformations. Superior firepower and large economic reserves ultimately enabled Japanese statesmen to discard mediators on the border and sideline a cohort of indigenous headmen who played both sides of the fence to maintain their chiefly status. Even with reluctant "allies" marginalized, however, the colonial state lacked sufficient resources to integrate Taiwan's indigenes into its disciplinary apparatus. The colonial state therefore created the Indigenous Territory, which exists to this day as a legacy of Japanese imperialism, local initiatives, and the global commodification of culture.

The Wages of Guilt Ian Buruma 2015-09-01 In this now classic book, internationally famed journalist Ian Buruma examines how Germany and Japan have attempted to come to terms with their conduct during World War II—a war that they aggressively began and humiliatingly lost, and in the course of which they committed monstrous war crimes. As he travels through both countries, to Berlin and Tokyo, Hiroshima and Auschwitz, he encounters people who are remarkably honest in confronting the past and others who astonish by their evasions of responsibility, some who wish to forget the past and others who wish to use it as a warning against the resurgence of militarism. Buruma explores these contrasting responses to the war and the two countries' very different ways of memorializing its atrocities, as well as the ways in which political movements, government policies, literature, and art have been shaped by its shadow. Today, seventy years after the end of the war, he finds that while the Germans have for the most part coped with the darkest period of their history, the Japanese remain haunted by historical controversies that should have been resolved long ago. Sensitive yet unsparring, complex and unsettling, this is a profound study of how people face up to or deny terrible legacies of guilt and shame.

Elements Europe Jean Attali 2017-03-31 Philippe Samyn, architect and engineer, created with this building for the European Council an architectural

masterpiece. Clever in its entirety and in every detail, in its iconic functions, and in its decorum, it perfectly reflects the aura of power that the 28 members of the European Union share together. In addition to Jean Attali and Philippe Samyn's view on the building phases, this book also includes the overall picture of the project. All the phases of the building process as well as the facilities are dealt with. Text in English, Dutch and French.

50 Years of Artificial Intelligence Max Lungarella 2007-12-10 This Festschrift volume, published in celebration of the 50th Anniversary of Artificial Intelligence, includes 34 refereed papers written by leading researchers in the field of Artificial Intelligence. The papers were carefully selected from the invited lectures given at the 50th Anniversary Summit of AI, held at the Centro Stefano Francsini, Monte Verità, Ascona, Switzerland, July 9-14, 2006. The summit provided a venue for discussions on a broad range of topics.

Zoomscape Mitchell Schwarz 2004-03 Although a few among us are intrepid architectural tourists, visiting buildings and landscapes our cameras at the ready, most of us experience architecture through the windshield of a moving vehicle, the architectural experience reduced to a blurry and momentary drive-by. And the rest of our architectural "tourism" is through the images of cameras, movies, and television programs -- that is, through the lens of another's eye. Architectural hisotrian Mitchell Schwarzer calls this new mediated architectural experience the "zoomscape." In this thought-provoking book, he argues that the perception of architecture has been fundamentally altered by the technologies of transportation and the camera -- we now look at buildings, neighborhoods, cities, and even entire continents as we ride in trains, cars, and planes, and/or as we view photographs, movies, and television. Zoomscape shows how we now perceive buildings and places at high speeds, across great distances, through edited and multiple reproductions. Nowadays, our views of the architectural landscape are modulated by the accelerator pedal and the remote control, by studio production techniques and airplane flight paths. Using examples from high art and popular culture -- from the novels of Don DeLillo to the opening credits of *The Sopranos* -- Mitchell Schwarzer shows that the zoomscape has brought about unprecedented and often marvelous new ways of perceiving the built environment.

History of Geoscience Wolf Mayer 2017 The study of the Earth's origin, its composition, the processes that changed and shaped it over time and the fossils preserved in rocks, have occupied enquiring minds from ancient times. The contributions in this volume trace the history of ideas and the research of scholars in a wide range of geological disciplines that have paved the way to our present-day understanding and knowledge of the physical nature of our planet and the diversity of life that inhabited it. To mark the 50th anniversary of the founding of the International Commission on the History of Geology, the book features contributions that give insights into its establishment and progress. In other sections authors reflect on the value of studying the history of the geosciences and provide accounts of early investigations in fields as diverse as tectonics, volcanology, geomorphology, vertebrate palaeontology and petroleum geology. Other papers discuss the establishment of geological surveys, the contribution of women to geology and biographical sketches of noted scholars in various fields of geoscience.

Pig Design Patterns Pradeep Pasupuleti 2014-04-17 A comprehensive practical guide that walks you through the multiple stages of data management in enterprise and gives you numerous design patterns with appropriate code examples to solve frequent problems in each of these stages. The chapters are organized to mimick the sequential data flow evidenced in Analytics platforms, but they can also be read independently to solve a particular group of problems in the Big Data life cycle. If you are an experienced developer who is already familiar with Pig and is looking for a use case standpoint where they can relate to the problems of data ingestion, profiling, cleansing, transforming, and egressing data encountered in the enterprises. Knowledge of Hadoop and Pig is necessary for readers to grasp the intricacies of Pig design patterns better.

In the Service of the Emperor Edward J. Drea 1998 In a series of searching examinations of the structure, ethos, and goals of the Japanese military establishment, Drea offers new material on its tactics, operations, doctrine, and leadership. Based on original military documents, official histories, court diaries, and Emperor Hirohito's own words, the author introduces Western readers to Japanese scholarship about the war and Japan's military institutions. In addition he uses declassified Allied intelligence documents related to Japan to challenge existing views and conventional wisdom about the war.

Servants' Stories Michelle Higgs 2015-09 Step into the world of domestic service and discover what life was really like for these unsung heroines (and heroes) of society. Between 1800 and 1950, the role of servants changed dramatically but they remained the people without whom the upper and middle classes could not function. Through oral histories, diaries, newspaper reports and never before seen testimonies, domestic servants tell their stories, warts and all - Downtown it isn't! * Revenge on a mistress with a box of beetles * The despair and loneliness of a 14 year old maid * The adventure of moving to London to go into service * An escape from an unhappy home life Find out about the 'servant problem' and how servants found work; how National Insurance began to improve their lot; the impact WW1 had on domestic service; and what was done to try to make the occupation appealing to a new generation. Praise for Michelle Higgs 'A delightful layman's guide for tourists from 2014, where you'll glean plenty of juicy detail to paint a more accurate picture of your ancestors' lives.' Family Tree (for A Visitor's Guide to Victorian England) 'An enjoyable and well-written social history, helpfully revealing more about what life would have been like 'below stairs'. Who Do You Think You Are? (for Tracing Your Servant Ancestors) 'Daily life is recounted with both historical detail and sympathy, aided by numerous first-person accounts.' Your Family Tree (for Life in the Victorian and Edwardian Workhouse) 'A lively text which should do much to open up the world of the Victorian prison to the general reader.' Who Do You Think You Are? Challenging Past and Present Ellen P. Conant 2006-02-28 The complex and coherent development of Japanese art during the course of the nineteenth century was inadvertently disrupted by a political event: the Meiji Restoration of 1868. Scholars of both the preceding Edo (1615-1868) and the succeeding Meiji (1868-1912) eras have shunned the decades bordering this arbitrary divide, thus creating an art-historical void that the former view as a period of waning technical and creative inventiveness and the latter as one threatened by Meiji reforms and indiscriminate westernization and modernization. Challenging Past and Present, to the contrary, demonstrates that the period 1840-1890, as seen progressively rarer than retrospectively, experienced a dramatic transformation in the visual arts, which in turn made possible the creative achievements of the twentieth century. The first group of chapters takes as its theme the diverse cultural currents of the transitional period, particularly as they applied to art.The second section deals with the inconsistent yet determinedly pragmatic courses pursued by artists, entrepreneurs, and patrons to achieve a secure footing in the uncertain terrain of early Meiji. Further chapters look at how painters and sculptors sought to absorb and integrate foreign influences and reinterpret their own stylistic mediums.

Housing in Postwar Japan - A Social History Ann Waswo 2013-12-19 Radical changes in the design of housing in post-war Japan had numerous effects on the Japanese people. Public policy toward housing provision and the effects of escalating land prices in Tokyo and a few other very large cities in the country from the mid- to late 1970s onward are examined, but it is dwellings themselves and the slow but steady shift from a floor-sitting to a chair-sitting housing culture in urban and suburban parts of the country that figure most prominently in the discussion. Central to the book is the author's translation of an account written by Kyoko Sasaki, an observant wife and mother, about the housing she and her growing family experienced during the 1960s, and subsequent chapters explore some of the issues that flow from her account. Chief among these are the small size and generally poor quality of the private-sector housing that Japanese of fairly ordinary means could afford to occupy in the early postwar years, the new design initiatives undertaken at about that time by public-sector housing providers and the diffusion of at least some of their initiatives to the housing sector as a whole, and the adjustments that the occupants of housing had to, or chose to, make as the dwellings available to them as renters or as owners changed in character. Attention is also paid to the structural requirements of dwellings and attitudes toward dwellings of diverse types in a country prone to earthquakes.

Modern Japanese Art and the Meiji State . Sato 2011 This is an insightful and intelligent re-thinking of Japanese art history & its Western influences. This broad-ranging and profoundly influential analysis describes how Western art institutions and vocabulary were transplanted to Japan in the late nineteenth century. In the 1870-80s, artists and government administrators in Japan encountered the Western 'system of the arts' for the first time. Under pressure to exhibit and sell its artistic products abroad, Japan's new Meiji government came face-to-face with the need to create European-style art schools and museums - and even to establish Japanese words for art, painting, artist, and sculpture. "Modern Japanese Art" is a full re-conceptualization of the field of Japanese art history, exposing the politics through which the words, categories, and values that structure our understanding of the field came to be while revealing the historicity of Western and non-Western art history.

Listening to Distant Thunder Philippa Hobbs 2014-10-15 Originally published by the Standard Bank as part of a curated exhibition in May 2011, this prestigious volume celebrates the life and works of Peter Clarke (1929-2014), one of South Africa's foremost artists. A mere 500 copies were originally published, all taken up at the exhibition, and continued demand has led to its re-release. Clarke left his job as a dockworker in Simon's Town to devote himself to art. The wisdom of this decision is reflected in a remarkable career, which extended over some six decades and was acknowledged in the awards of the Order of Ikhamanga (silver) in 2005 and a Lifetime Achievement Award in 2010. Listening to distant thunder: The art of Peter Clarke recounts an artist's life in the context of the social history of South Africa from the 1940s onwards. His images reflect the social disruption of the Cape Flats, and the trauma of his community's forced removal from Simon's Town to the bleak apartheid township of Ocean View. Yet Clarke's images have avoided bitterness, and his work is a perceptive scrutiny and celebration of life in all its aspects. Illustrated with over 200 reproductions and photographs, this book was researched and written by well-known South African art historians Philippa Hobbs and Elizabeth Rankin, in close collaboration with the artist over almost seven years. *Crossword Solver* Anne Stibbs 2000 An aid to solving crosswords. It contains over 100,000 potential solutions, including plurals, comparative and superlative adjectives, and inflections of verbs. The list extends to first names, place names and technical terms, euphemisms and compound expressions, as well as abbreviations.
