Homer Simpson Marches on Washington Timothy M. Dale, Joseph J. Foy, 2010-03-19 The Simpsons questions what is culturally acceptable, showcasing controversial issues like homosexuality, animal rights, the war on terror, and religion. This subtle form of political analysis is effective in changing opinions and attitudes on a large scale. **Homer Simpson Marches on Washington** explores the transformative power that enables popular culture to influence political agendas, frame the consciousness of audiences, and create profound shifts in values and ideals. To investigate the full spectrum of popular culture in a democratic society, editors Timothy M. Dale and Joseph J. Foy gather a top-notch team of scholars who use television shows such as Star Trek, The X-Files, All in the Family, The View, The Daily Show with Jon Stewart, and The Colbert Report, as well as movies and popular music, to investigate contemporary issues in American popular culture.

Archaeology Anthropology and Interstellar Communication Douglas A. Douglas A. Vakoch, 2015-03-24 Addressing a field that has been dominated by astronomers, physicists, engineers, and computer scientists, the contributors to this collection raise questions that may have been overlooked by physical scientists about the ease of establishing meaningful communication with an extraterrestrial intelligence. These scholars are grappling with some of the enormous challenges that will face humanity if an information-rich signal emanating from another world is detected. By drawing on issues at the core of contemporary archaeology and anthropology, we can be much better prepared for contact with an extraterrestrial civilization, should that day ever come.

Online Communication Andrew F. Wood, Matthew J. Smith, 2004-09-22 Online Communication

provides an introduction to both the technologies of the Internet Age and their social implications. This innovative and timely textbook brings together current work in communication, political science, philosophy, popular culture, history, economics, and the humanities to present an examination of the theoretical and critical issues in the study of computer-mediated communication. Continuing the model of the best-selling first edition, authors Andrew F. Wood and Matthew J. Smith introduce computer-mediated communication (CMC) as a subject of academic research as well as a lens through which to examine contemporary trends in society. This second edition of *Online Communication* covers online identity, mediated relationships, virtual communities, electronic commerce, the digital divide, spaces of resistance, and other topics related to CMC. The text also examines how the Internet has affected contemporary culture and presents the critiques being made to those changes. Special features of the text include: *Hyperlinks--presenting greater detail on topics from the chapter *Ethical Inquiry--posing questions on the nature of human communication and conduct online *Online Communication and the Law--examining the legal ramifications of CMC issues Advanced undergraduates, graduate students, and researchers interested in the field of computer-mediated communication, as well as those studying issues of technology and culture, will find *Online Communication* to be an insightful resource for studying the role of technology and mediated communication in today's society.

Combinatorics and Graph Theory John Harris,Jeffrey L. Hirst,Michael Mossinghoff,2009-04-03
These notes were first used in an introductory course team taught by the authors at Appalachian State University to advanced undergraduates and beginning graduates. The text was written with four pedagogical goals in mind: offer a variety of topics in one course, get to the main themes and tools as efficiently as possible, show the relationships between the different topics, and include

recent results to convince students that mathematics is a living discipline.

Post Memes Daniel Bristow, Alfie Bown, 2019 Art-form, send-up, farce, ironic disarticulation, pastiche, propaganda, trololololol, mode of critique, mode of production, means of politicisation, even of subjectivation - memes are the inner currency of the internet's circulatory system. Independent of any one set value, memes are famously the mode of conveyance for the alt-right, the irony left, and the apoliticals alike, and they are impervious to many economic valuations: the attempts made in co-opting their discourse in advertising and big business have made little headway, and have usually been derailed by retaliative meming. **POST MEMES: SEIZING THE MEMES OF PRODUCTION** takes advantage of the meme's subversive adaptability and ripeness for a focused, in-depth study. Pulling together the interrogative forces of a raft of thinkers at the forefront of tech theory and media dissection, this collection of essays paves a way to articulating the semiotic fabric of the early 21st century's most prevalent means of content posting, and aims at the very seizing of the memes of production for the imagining and creation of new political horizons. With contributions from Scott and McKenzie Wark, Patricia Reed, Jay Owens, Thomas Hobson and Kaajal Modi, Dominic Pettman, Bogna M. Konior, and Eric Wilson, among others, this essay volume offers the freshest approaches available in the field of memes studies and inaugurates a new kind of writing about the newest manifestations of the written online. The book aims to become the go-to resource for all students and scholars of memes, and will be of the utmost interest to anyone interested in the internet's most viral phenomenon. **ABOUT THE EDITORS** ALFIE BOWN is the author of several books including *The Playstation Dreamworld* (Polity, 2017) and *In the Event of Laughter: Psychoanalysis, Literature and Comedy* (Bloomsbury, 2018). He is also a journalist for the Guardian, the Paris Review, and other outlets. DAN BRISTOW is a recovering academic, a

bookseller, and author of *Joyce and Lacan: Reading, Writing, and Psychoanalysis* (Routledge, 2016) and *2001: A Space Odyssey and Lacanian Psychoanalytic Theory* (Palgrave, 2017). He is also the co-creator with Alfie Bown of *Everyday Analysis*, now based at *New Socialist* magazine.

The Essential Cult TV Reader David Lavery, 2021-09-15 The Essential Cult TV Reader is a collection of insightful essays that examine television shows that amass engaged, active fan bases by employing an imaginative approach to programming. By exploring the defining characteristics of cult TV, The Essential Cult TV Reader traces the development of this once obscure form and explains how cult TV achieved its current status as legitimate television. The essays explore a wide range of cult programs, from early shows such as *Star Trek*, *The Avengers*, *Dark Shadows*, and *The Twilight Zone* to popular contemporary shows such as *Lost*, *Dexter*, and *24*, addressing the cultural context that allowed the development of the phenomenon. The contributors

investigate the obligations of cult series to their fans, the relationship of camp and cult, the effects of DVD releases and the Internet, and the globalization of cult TV. The Essential Cult TV Reader answers many of the questions surrounding the form while revealing emerging debates on its future.

Consciousness and the Brain Stanislas Dehaene, 2014-01-30 WINNER OF THE 2014 BRAIN PRIZE From the acclaimed author of *Reading in the Brain* and *How We Learn*, a breathtaking look at the new science that can track consciousness deep in the brain How does our brain generate a conscious thought? And why does so much of our knowledge remain unconscious? Thanks to clever psychological and brain-imaging experiments, scientists are closer to cracking this mystery than ever before. In this lively book, Stanislas Dehaene describes the pioneering work his lab and the labs of other cognitive neuroscientists worldwide have accomplished in defining, testing, and explaining the brain events behind a conscious state. We can now pin down the neurons that fire when a person reports becoming aware of a piece of information and understand the crucial role unconscious computations play in how we make decisions. The emerging theory enables a test of consciousness in animals, babies, and those with severe brain injuries. A joyous exploration of the mind and its thrilling complexities, *Consciousness and the Brain* will excite anyone interested in cutting-edge science and technology and the vast philosophical, personal, and ethical implications of finally quantifying consciousness.

Karma Of Brown Folk Vijay Prashad, 2001-03-12 Village Voice Favorite Books of 2000 The popular book challenging the idea of a model minority, now in paperback! "How does it feel to be a problem?" asked W. E. B. Du Bois of black Americans in his classic *The Souls of Black Folk*. A hundred years later, Vijay Prashad asks South Asians "How does it feel to be a solution?" In this kaleidoscopic critique, Prashad looks into the complexities faced by the members of a "model minority"-one, he claims, that is consistently deployed as a weapon in the war against black America. On a vast canvas, *The Karma of Brown Folk* attacks the two pillars of the "model minority" image, that South Asians are both inherently successful and pliant, and analyzes the ways in which U.S. immigration policy and American Orientalism have perpetuated these stereotypes. Prashad uses irony, humor, razor-sharp criticism, personal reflections, and historical research to challenge the arguments made by Dinesh D'Souza, who heralds South Asian success in the U.S., and to question the quiet accommodation to racism made by many South Asians. A look at Deepak Chopra and others whom Prashad terms "Godmen" shows us how some South Asians exploit the stereotype of inherent spirituality, much to the chagrin of other South Asians. Following the long engagement of American culture with South Asia, Prashad traces India's effect on thinkers like Cotton Mather and Henry David Thoreau, Ravi Shankar's influence on John Coltrane, and such essential issues as race

versus caste and the connection between antiracism activism and anticolonial resistance. The Karma of Brown Folk locates the birth of the “model minority” myth, placing it firmly in the context of reaction to the struggle for Black Liberation. Prashad reclaims the long history of black and South Asian solidarity, discussing joint struggles in the U.S., the Caribbean, South Africa, and elsewhere, and exposes how these powerful moments of alliance faded from historical memory and were replaced by Indian support for antiblack racism. Ultimately, Prashad writes not just about South Asians in America but about America itself, in the tradition of Tocqueville, Du Bois, Richard Wright, and others. He explores the place of collective struggle and multiracial alliances in the transformation of self and community-in short, how Americans define themselves.

Britain Andrew Whittaker, 2009 British culture is strewn with names that strike a chord the world over such as Shakespeare, Churchill, Dickens, Pinter, Lennon and McCartney. This book

examines the people, history and movements that have shaped Britain as it now is, providing key information in easily digested chunks.

The Scientific Imaginary in Visual Culture Anneke Smelik, 2010 Popular media, art and science are intricately interlinked in contemporary visual culture. This book analyses the scientific imaginary that is the result of the profound effects of science upon the imagination, and conversely, of the imagination in and upon science. As scientific developments in genetics occur and information technology and cybernetics open up new possibilities of intervention in human lives, cultural theorists have explored the notion of the posthuman. *The Scientific Imaginary in Visual Culture* analyses figurations of the posthuman in history and philosophy, as well as in its utopian and dystopian forms in art and popular culture. The authors thus address the blurring boundaries between art and science in diverse media like science fiction film, futurist art, video art and the new phenomenon of bio-art. In their evaluations of the scientific imaginary in visual culture, the authors engage critically with current scientific and technological concerns.

Enviro-Toons Deidre M. Pike, 2014-01-10 This book takes an ecocritical approach to analytical readings of animated feature films, short subjects and television shows. Beginning with the “simply subversive” environmental messages in the Felix the Cat cartoons of the 1920s, the author examines “green” themes in such popular animated film efforts as *Bambi* (1942), *The Simpsons Movie* (2007), *Wall-E* (2008) and *Happy Feet* (2008), as well as James Cameron’s live action/animation blockbuster *Avatar* (2009). The discussion extends beyond American films to include the works of Japanese animator Hayao Miyazaki, including the Oscar-winning *Spirited Away* (2002). Also evaluated for their pro-ecological content are the television cartoon series *South Park* and *Futurama*. The appendix provides a list of film and television titles honored with the Environmental Media Award

for Animation.
