Brain Storm Optimization Algorithms Shi Cheng, Yuhui Shi, 2019-06-03 Brain Storm Optimization (BSO) algorithms are a new kind of swarm intelligence method, which is based on the collective behavior of human beings, i.e., on the brainstorming process. Since the introduction of BSO algorithms in 2011, many studies on them have been conducted. They not only offer an optimization method, but could also be viewed as a framework of optimization techniques. The process employed in the algorithms could be simplified as a framework with two basic operations: the converging operation and the diverging operation. A "good enough" optimum could be obtained through recursive

solution divergence and convergence. The resulting optimization algorithm would naturally have the capability of both convergence and divergence. This book is primarily intended for researchers, engineers, and graduate students with an interest in BSO algorithms and their applications. The chapters cover various aspects of BSO algorithms, and collectively provide broad insights into what these algorithms have to offer. The book is ideally suited as a graduate-level textbook, whereby students may be tasked with the study of the rich variants of BSO algorithms that involves a hands-on implementation to demonstrate the utility and applicability of BSO algorithms in solving optimization problems.

Hearts and Mines Tanner Mirrlees, 2016-01-15 The US security state is everywhere in cultural products: in army-supported news stories, TV shows, and video games; in CIA-influenced blockbusters and comics; and in State Department ads, broadcasts, and websites. Hearts and Mines examines the rise and reach of the US Empire's culture industry - a nexus between the US's security state and media firms and the source of cultural products that promote American strategic interests around the world. Building on Herbert I. Schiller's classic study of US Empire and communications, Tanner Mirrlees interrogates the symbiotic geopolitical and economic relationships between the US state and media firms that drive the production of imperial culture.

Josie O'Malley does a lot to help out Mam after her father goes off to fight the Nazis, but she wishes she could do more—like all those caped heroes who now seem to have disappeared. If Josie can't fly and control weather like her idol, Zenobia, maybe she can put her math smarts to use cracking puzzles for the government. After an official tosses out her puzzler test because she's a girl, it soon becomes clear that an even more top-secret agency has its eye on Josie, along with two other applicants: Akiko and Mae. The trio bonds over their shared love of female superhero celebrities, from Hauntima to Zenobia to Hopscotch. But during one extraordinary afternoon, they find themselves transformed into the newest (and youngest!) superheroes in town. As the girls' abilities slowly begin to emerge, they learn that their skills will be crucial in thwarting a shapeshifting henchman of Hitler, and, just maybe, in solving an even larger mystery about the superheroes who've recently gone missing. Inspired by remarkable real-life women from World War II—the human computers and earliest programmers called "the ENIAC Six"—this pulse-pounding adventure features bold action and brave thinking, with forty-eight pages of comic book style graphic panels throughout the book. Mark My Words Mishuana Goeman, 2013-04-12 Dominant history would have us believe that colonialism belongs to a previous era that has long come to an end. But as Native people become mobile, reservation lands become overcrowded and the state seeks to enforce means of containment, closing its borders to incoming, often indigenous, immigrants. In *Mark My Words*, Mishuana Goeman traces settler colonialism as an enduring form of gendered spatial violence, demonstrating how it persists in the contemporary context of neoliberal globalization. The book argues that it is vital to refocus the efforts of Native nations beyond replicating settler models of territory, jurisdiction, and race. Through an examination of twentieth-century Native women's poetry and prose, Goeman illuminates how these works can serve to remap settler geographies and center Native knowledges. She positions Native women as pivotal to how our nations, both tribal and nontribal, have been imagined and mapped, and how these women play an ongoing role in decolonization. In a strong and lucid voice, Goeman provides close readings of literary texts, including those of E. Pauline Johnson, Esther Belin, Joy Harjo, Leslie Marmon Silko, and Heid Erdrich. In addition, she places these works in the framework of U.S. and Canadian Indian law and policy. Her charting of women's struggles to define themselves and their communities reveals the significant power in all of our stories.
