Eugene Trundle

Servicing TV, Satelllite and Video Equipment Eugene Trundle,1997 The first edition of this unique `hands-on' fault-finding book became the guide and mentor for thousands of service technicians and engineers in many countries and was widely adopted as a college text. In its new and updated form its usefulness is enhanced by five new chapters, including fault diagnosis in digital TV and video equipment, satellite-receiver repair and interfacing/hookup. All the chapters have been newly revised and brought up to date. Based on many years of practical bench and field experience, the book wastes little space on theoretical principles and circuit description where it is well covered elsewhere: here the emphasis is on the practical business of fault diagnosis and repair. Twenty chapters focus on specific aspects of the equipment, dwelling longest on the most troublesome: TV power supplies, line timebases and video deck machines. Other chapters examine test-gear, intermittent faults, repair techniques and workshop practice. A symptom index is included for easy reference. Written for PAL, the differences for those working with NISC and other standards are also covered. Eugene Trundle is a full time TV and video service engineer. His articles appear regularly in Television and several other magazines. He is the author of the best-selling Newnes TV and Video Engineer's Pocket Book and Newnes Guide to TV and Video Technology. Includes latest satellite and digital equipment Covers PAL but also mentions differences for those working with NTSC and other standards
