📖 **SMART DECISIONS** THOMAS N. MARTIN,2016

📖 **DECISIONS AND NON-DECISIONS: A PRAGMATIC VIEW OF POWER, STRUCTURE, AND CULTURE IN COMPLEX ORGANIZATIONS** EILEEN GRIFFIN-RAY,2022-01-25 This book explores decision-making and the creation of a culture of non-decision in complex organizations. Considered part of the decision-making process, this book addresses the role of power, structure and ethics of individual leaders and the impact on organizational culture. An authoritarian leader can suppress contributions while an indecisive leader can develop a culture of ambiguity in an organization. The book looks at the reality, and the consequences, of both extremes and considers the space in between. Both historical and current theories and ideas are described and discussed. Several leaders are interviewed contributing their lived experiences in the realm of decision-making and leadership. They describe experiences in organizations from their perspective as leaders between subordinates and more senior leaders within the organizational hierarchy. The book addresses ways key decision-makers use power, manage culture, and create structures to make decisions. The optimal structure for effective decision-making is explored. Finally, the author considers how a culture of non-decision occurs. In recent years, some organizations have attempted to reduce or eliminate the traditional hierarchical structure in favor of a flatter structure with fewer layers and more collaborative decision making. These efforts are compared to historical business structures.

📖 **A SYSTEMS THINKING DECISION-MAKING PROCESS** VINCENT P. BARABBA,2022 This book illustrates how to access the right information for making the best decisions during turbulent times. It is written from an experienced-based perspective that is beneficial for those looking for the development and improvement of the decision-making process. The approach is centered on the author's experience in developing and implementing effective and efficient approaches to decision-making in business and government. Based on those experiences, this book provides insights into how to improve the decision making process of your organization, whether it be large or small. For decision makers and those providing market information for making decisions, this book provide guidelines for a framework which includes systems thinking. For those interested in change management and corporate governance, the book presents examples where it was done well and some examples where it was not and the ensuring consequences.

📖 **A LEADERSHIP PERSPECTIVE ON DECISION MAKING** MARCUS SELART,2010-01-01 This book is concerned with helping you improve your approach to decision-making. The author examines judgement in a selection of managerial contexts and provides important understanding that can help you make better leadership decisions. The book also pinpoints the in-house politics of organisational decision-making. Drawing on the very latest research, it introduces practical techniques that show you how to analyse and develop your own decision-making style. It will help you to deliver sharp and insightful analyses of your business and develop effective solutions. In addition, it presents simple checklists that will give you vital insights throughout the decision-making process. Students and practitioners of leadership, management, and allied fields will find this book useful in order to understand and implement useful methods.

📖 **INTERCONNECTING SMART OBJECTS WITH IP** JEAN-PHILIPPE VASSEUR,ADAM DUNKELS,2010-07-06 Interconnecting Smart Objects with IP: The Next Internet explains why the Internet Protocol (IP) has become the protocol of choice for smart object networks. IP has successfully demonstrated the ability to interconnect billions of digital systems on the global Internet and in private IP networks. Once smart objects can be easily interconnected, a whole new class of smart object systems can begin to evolve. The book discusses how IP-based smart object networks are being designed and deployed. The book is organized into three parts. Part 1 demonstrates why the IP architecture is well suited to smart object networks, in contrast to non-IP based sensor network or other proprietary systems that interconnect to IP networks (e.g. the public Internet of private IP networks) via hard-to-manage and expensive multi-protocol translation gateways that scale poorly. Part 2 examines protocols and algorithms, including smart objects and the low power link layers technologies used in these networks. Part 3 describes the following smart object network applications: smart grid, industrial automation, smart cities and urban networks, home automation, building automation, structural health monitoring, and container tracking. Shows in detail how connecting smart objects impacts our lives with practical implementation examples and case studies Provides an in depth understanding of the technological and architectural aspects underlying smart objects technology Offers an in-depth examination of relevant IP protocols to build large scale smart object networks in support of a myriad of new services

📖 **PASTE TAILINGS MANAGEMENT** EROL YILMAZ,MAMADOU FALL,2017-03-03 This book provides an overview of paste tailings disposal at mine sites. It deals comprehensively with the characterization of sulphide-rich tailings, geotechnical and microstructural behaviour, surface tailings disposal applications, underground paste backfilling, and case studies. The authors place emphasis on the characterization, monitoring, disposal and treatment, as well as environmental considerations of problematic sulphidic tailings. The framework is supported by worldwide case studies.

📖 **SHARING WATER IN SOUTHERN AFRICA** JOHN PALLETT,1997

📖 **EROSION AND SEDIMENTATION** PIERRE Y. JULIEN,2010-06-10 The second edition of this acclaimed, accessible textbook brings the subject of sedimentation and erosion up-to-date, providing an excellent primer on both fundamental concepts of sediment-transport theory and methods for practical applications. The structure of the first edition is essentially unchanged, but all the chapters have been updated, with several chapters reworked and expanded significantly. Examples of the new additions include the concept of added mass, the modified Einstein procedure, sediment transport by size fractions, sediment transport of sediment mixtures, and new solutions to the Einstein integrals. Many new examples and exercises have been added. Erosion and Sedimentation is an essential textbook on the topic for students in civil and environmental engineering and the geosciences, and also as a handbook for researchers and professionals in engineering, the geosciences and the water sciences.

📖 **PILING ENGINEERING** KEN FLEMING,1994-03-17 A paperback edition of this highly successful volume. Piling is a fast-moving field, and in recent years there have been major advances in theory, methods, testing procedures and equipment, all of which are covered here. This is a detailed manual with a marked emphasis on practice.

📖 **LTE FOR PUBLIC SAFETY** RAINER LIEBHART,DEVAKI CHANDRAMOULI,CURT WONG,JÜRGEN MERKEL,2015-05-06 The aim of the book is to educate government agencies, operators, vendors and other regulatory institutions how LTE can be deployed to serve public safety market and offer regulatory / public safety features. 📖 **RESTORING DISTURBED LANDSCAPES** DAVID J TONGWAY,JOHN A LUDWIG,2011-03-15 Restoring Disturbed Landscapes is a hands-on guide for individuals and groups seeking to improve the functional capacity of landscapes. The book presents a five-step, adaptive procedure for restoring landscapes that is supported by proven principles and concepts of ecological science. Written by restoration experts with a wealth of experience teaching restoration principles and techniques to practitioners and would-be practitioners from a variety of backgrounds, the book offers: an outline of a science-based, ecologically sound approach to restoration discussion of the conceptual framework and rigorous principles that underlie the approach case studies of two types of restoration projects (restoring mined landscapes and restoring damaged rangelands) that illustrate how the approach, framework, and four key principles for restoring landscapes have been implemented a variety of scenarios that represent typical restoration problems and how those problems can be handled indicators for monitoring and how landscape function can be tracked and analyzed as part of a comprehensive monitoring program. Abundantly illustrated with photos and figures that clearly explain concepts outlined in the book, Restoring Disturbed Landscapes is an engaging and accessible work designed specifically for restoration practitioners with limited training or experience in the field. It tells restorationists where to start, what information they need to acquire, and how to apply this information to their specific situations.
