**The Imperial Japanese Navy in the Pacific War** Mark Stille,2014-11-20 An highly illustrated examination of the key ships, tactics and operations of the Imperial Japanese Navy in the War in the Pacific in World War II. The Imperial Japanese Navy (IJN) was the third most powerful navy in the world at the start of World War II, and came to dominate the Pacific in the early months of the war. This was a remarkable turnaround for a navy that only began to modernize in 1868, although defeats inflicted on the Russians and Chinese in successive wars at the turn of the century gave a sense of the threat the IJN was to pose. Bringing together for the first time material previously published in Osprey series books, and with the addition of new writing making use of the most recent research, this book details the Japanese ships which fought in the Pacific and examines the principles on which they were designed, how they were armed, when and where they were deployed and how effective they were in battle. The Imperial Japanese Navy in the Pacific War provides a history of the IJN's deployment and engagements, analysis of the evolution of strategy and tactics, and finally addresses the question of whether it truly was a modern navy, fully prepared for the rigors of combat in the Pacific. Illustrated throughout with photographs and detailed colour artworks, this is a valuable reference source for Pacific War enthusiasts and historians alike.

*The Tiger Of Malaya:* Lt. Col. Aubrey Saint Kenworthy,2015-11-06 Includes over 30 illustrations As in Nazi occupied countries that were liberated by the Allies, horrible crimes had been uncovered, perpetrated in the name of superior culture on defenceless civilians and prisoners of war. As the emaciated American, British, Australian soldiers emerged from the prisoner of war camps with barbaric tales of torture, mistreatment and neglect, it was clear that justice must be sought. The U.S. Military fixed on two Japanese generals who were foremost in causing and ordering these outrages, the conqueror of Malaya Tomoyuki Yamashita and the notorious "Death March" Masaharu Homma. Lt. Col. Kenworthy was a member of the U.S. military police assigned to the Philippines and saw at first hand the military tribunal ordered at the express command of General MacArthur. He was detailed to guard both Yamashita and Homma during the trial and was able to view their reactions to the detailed evidence that was used against them. He was determined to write this account of this momentous event, he recorded not only the evidence of the crimes but also the stoic calm with which the two generals faced the weight of Allied Justice. A fascinating sidelight on the ending of the World War Two.

Fighter Combat Robert L. Shaw,1985 This book provides a detailed discussion of one-on-one dog-fights and multi-fighter team work tactics. Full discussions of fighter aircraft and weapons systems performance are provided along with an explanation of radar intercept tactics and an analysis of the elements involved in the performance of fighter missions.

**Danger's Hour** Maxwell Taylor Kennedy,2009-11-03 Drawing on years of research and firsthand interviews with both American and Japanese survivors, Maxwell Taylor Kennedy draws a gripping portrait of men bravely serving their countries in war and the advent of a terrifying new weapon, suicide bombing, that nearly halted the most powerful nation in the world. In the closing months of World War II, Americans found themselves facing a new weapon: kamikazes--the first men to use airplanes as suicide weapons. By the beginning of 1945, facing imminent invasion, Japan turned to its most idealistic young men and demanded of them the greatest sacrifice. On May 11, 1945, days after Germany's surrender, the USS Bunker Hill--with thousands of crewmen and the most sophisticated naval technology available--was 70 miles off the coast of Okinawa when pilot Kiyoshi Ogawa flew his plane into the ship, killing 393 Americans in the worst suicide attack against America until September 11.--From publisher description.

Fork-Tailed Devil: The P-38 Martin Caidin, 2016-10-05 One of America's greatest military aviation historians relates the astonishing--and true--story of the only American warplane to fight in every operational theater in World War II from Pearl Harbor to Alaska and North Africa to Northern Europe.

Introduction to UAV Systems Paul G. Fahlstrom, Thomas J. Gleason, 2012-07-11 Unmanned aerial vehicles (UAVs) have been widely adopted in the military world over the last decade and the success of these military applications is increasingly driving efforts to establish unmanned aircraft in non-military roles. Introduction to UAV Systems, 4th edition provides a comprehensive introduction to all of the elements of a complete Unmanned Aircraft System (UAS). It addresses the air vehicle, mission planning and control, several types of mission payloads, data links and how they interact with mission performance, and launch and recovery concepts. This book provides enough information to encourage a student to learn more; to provide a specialist with a basic appreciation of the technical issues that drive other parts of the system and interact with their specialty; or to help a program manager understand system-level tradeoffs and know what questions to ask. Key features: Comprehensive overview of all elements of a UAS and of how they interact. Introduces the underlying concepts of key subsystems. Emphasizes system-integration issues and how they relate to subsystem design choices. Practical discussion of issues informed by lessons learned in UAV programs. Introduction to UAV Systems, 4th edition is written both for newcomers to the subject and for experienced members of the UAV community who desire a comprehensive overview at the system level. As well as being a primary text for an introductory course on UAS or a supplementary text in a course that goes into more depth in one of the individual technologies involved in a UAS, this book is a useful overview for practicing engineers, researchers, managers, and consultants interested in UAV systems.

**B-29 Hunters of the JAAF** Koji Takaki, Henry Sakaida, 2012-10-20 B-29!' No other term struck such terror in the hearts of the Japanese public during World War 2 than this single, most-hated name. It was then only natural that the pilots who attempted to shoot these high-flying Boeing bombers out of the skies over Tokyo, Nagasaki, Hiroshima and Kobe should become known as the elite of the Japanese Army Air Force. This book details the exploits of the 'Dragon Slayers' who, flying the very latest single and twin-engined fighters, exacted a heavy toll on the AAF Boeing bombers using a range of tactics including ramming.

**Decision at Nagasaki** Fred J. Olivi, William R. Watson (Jr.), 1999

**The First Team** John Lundstrom, 2013-04-11 Hailed as one of the finest examples of aviation research, this comprehensive 1984 study presents a detailed and scrupulously accurate operational history of carrier-based air warfare. From the earliest operations in the Pacific through the decisive Battle of Midway, it offers a narrative account of how ace fighter pilots like Jimmy Thach and Butch O'Hare and their skilled VF squadron mates - called the first team - amassed a remarkable combat record in the face of desperate odds. Tapping both American and Japanese sources, historian John B. Lundstrom reconstructs every significant action and places these extraordinary fighters within the context of overall carrier operations. He writes from the viewpoint of the pilots themselves, after interviewing some fifty airmen from each side, to give readers intimate details of some of the most exciting aerial engagements of the war. At the same time he assesses the role the fighter squadrons played in key actions and shows how innovations in fighter tactics and gunnery techniques were a primary reason for the reversal of American fortunes. After more than twenty years in print, the book remains the definitive account and is being published in paperback for the first time to reach an even larger audience.

*War's End* Charles W. Sweeney, James A. Antonucci, Marion K. Antonucci, 2018-09-25 On August 9, 1945, on the tiny island of Tinian in the South Pacific, a twenty-five-year-old American Army Air Corps major named Charles W. Sweeney climbed aboard a B-29 Superfortress in command of his first

combat mission, one devised specifically to bring a long and terrible war to a necessary conclusion. In the belly of his bomber, Bock's Car, was a newly developed, fully armed weapon that had never been tested in a combat situation. It was a weapon capable of a level of destruction never before dreamed of in the history of the human race, a bomb whose terrifying aftershock would ultimately determine the direction of the twentieth century and change the world forever. The last military officer to command an atomic mission, Major General Charles W. Sweeney has the unique distinction of having been an integral part of both the Hiroshima and the Nagasaki bombing runs. Now updated with a new epilogue from the co-author, his book is an extraordinary chronicle of the months of careful planning and training; the setbacks, secrecy, and snafus; and the nerve-shattering final seconds and the astonishing aftermath of what is arguably the most significant single event in modern history: the employment of an atomic weapon during wartime. **Corky Meyer's Flight Journal** Corwin H. Meyer, 2006 Designing high-performance military aircraft in the slide-rule era was challenging. Being the first person to fly these airplanes and expand an aircraft's flight envelope was often very frightening, if not downright deadly. It is hard to believe that someone could really endure 22 years in this occupation, plus another 30 years in the aircraft industry, often leading the industry-wide transition from large, too-complicated piston engines to doggy, unreliable jet engines and from 300-mile-per-hour (barn doors through slippery transonic and supersonic airframes. But this is, in fact, the truly remarkable v if not virtually unparalleled v life story of Corky Meyer. In an occupation and time which killed many, if not most, this man had the brains, skill, and good luck to meet every challenge that faced him and survive to tell his amazing story. It is a story that covers the most important era in the history of flight, told by a man at the epicenter of the activity. Corky Meyer's Flight Journal is an electrifying tale of a very passionate and patriotic man, his wife and family, and of course his numerous sensational close calls as an experimental fighter test pilot.

Spitfire VC vs A6M2/3 Zero-sen Peter Ingman, 2019-05-30 Just weeks after Pearl Harbor, Darwin was mauled by a massive Japanese attack. Without a single fighter to defend Australian soil, the Australian government made a special appeal to Britain for Spitfires. A year later the Spitfire VC-equipped No 1 Fighter Wing, RAAF, faced the battle-hardened 202nd Kokutai of the IJNAF, equipped with A6M2 Zero-sens, over Darwin. This was a gruelling campaign between evenly matched foes, fought in isolation from the main South Pacific battlegrounds. Pilots on either side had significant combat experience, including a number of Battle of Britain veterans. The Spitfire had superior flight characteristics but was hampered by short range and material defects in the tropical conditions, while the Japanese employed better tactics and combat doctrine inflicting serious losses on the over-confident Commonwealth forces. Fully illustrated with detailed full-colour artwork, this is the gripping story of two iconic aircraft facing off against each other above Australia.

The Japanese Aircraft Industry , 2020-06-23 This book has been considered by academicians and scholars of great significance and value to literature. This forms a part of the knowledge base for future generations. So that the book is never forgotten we have represented this book in a print format as the same form as it was originally first published. Hence any marks or annotations seen are left intentionally to preserve its true nature.

*Zero Fighter* Martin Caidin, 1970 The agile, brilliant fighter planes and their masterly pilots blasted all oppositions from the air. The '... weren't just good--they were hell on wheels'. For a fatally long time the horrifying reports came in and were disbelieved. For that space zero fighter ruled the Pacific sky.
