**The Imperial Japanese Navy in the Pacific War** Mark Stille, 2014-11-20 An highly illustrated examination of the key ships, tactics and operations of the Imperial Japanese Navy in the War in the Pacific in World War II. The Imperial Japanese Navy (IJN) was the third most powerful navy in the world at the start of World War II, and came to dominate the Pacific in the early months of the war. This was a remarkable turnaround for a navy that only began to modernize in 1868, although defeats inflicted on the Russians and Chinese in successive wars at the turn of the century gave a sense of the threat the IJN was to pose. Bringing together for the first time material previously published in Osprey series books, and with the addition of new writing making use of the most recent research, this book details the Japanese ships which fought in the Pacific and examines the principles on which they were designed, how they were armed, when and where they were deployed and how effective they were in battle. The Imperial Japanese Navy in the Pacific War provides a history of the IJN's deployment and engagements, analysis of the evolution of strategy and tactics, and finally addresses the question of whether it truly was a modern navy, fully prepared for the rigors of combat in the Pacific. Illustrated throughout with photographs and detailed colour artworks, this is a valuable reference source for Pacific War enthusiasts and historians alike.

*Danger's Hour* Maxwell Taylor Kennedy, 2009-11-03 Drawing on years of research and firsthand interviews with both American and Japanese survivors, Maxwell Taylor Kennedy draws a

gripping portrait of men bravely serving their countries in war and the advent of a terrifying new weapon, suicide bombing, that nearly halted the most powerful nation in the world. In the closing months of World War II, Americans found themselves facing a new weapon: kamikazes--the first men to use airplanes as suicide weapons. By the beginning of 1945, facing imminent invasion, Japan turned to its most idealistic young men and demanded of them the greatest sacrifice. On May 11, 1945, days after Germany's surrender, the USS Bunker Hill--with thousands of crewmen and the most sophisticated naval technology available--was 70 miles off the coast of Okinawa when pilot Kiyoshi Ogawa flew his plane into the ship, killing 393 Americans in the worst suicide attack against America until September 11.--From publisher description.

*Kamikaze Attacks of World War II* Robin L. Rielly, 2010 This book details more than 400 kamikaze attacks performed by Japanese aircraft, manned torpedoes, suicide boats and suicide swimmers against U.S. ships during World War II. Part One focuses on the traditions, development and history. Part Two details the kamikaze attacks on ships. Appendices list all of the U.S. ships suffering kamikaze attacks--Provided by publisher.

**The Ardennes** J. Mark Connell, 2003 In December 1944, desperate to hold out for the new weaponry he expected and shocked by losing the port of Antwerp, Adolf Hitler embarked on an audacious counter-offensive that was intended to drive back the all-conquering Allied forces that had caused Germany to retreat from Normandy to its own borders. It was a foolhardy exercise but it had surprise on its side and for some days the fate

of the war in Europe was in the hands of the commanders and men of a few American divisions and some supporting British forces. The Germans got within a few miles of their first objective - the River Meuse - but, by then, their own shortcomings had been found out and the Allies had regrouped. This avidly studied battle is given a fresh and all-embracing approach in this 55000 word account of the fluctuating fortunes of the combatants and the role in the action of the leading generals, including Eisenhower, Patton, Montgomery, Model, Dietrich and von Rundstedt. Though Germany was destined for defeat, its industry produced remarkable amounts of weaponry for this offensive and an assortment of troops, many too young or too old, were assembled for Hitler's astonishing but ultimately futile final battlefield venture. The Battle of the Bulge is an example of a short action where almost every military tactic was deployed and is charted on a daily basis here.

**The Petlyakov Pe-2** Peter C Smith, 2020-03-30 During the Second World War, the Soviet Union's Petlyakov Pe-2 \_Peshka\_ dive-bomber was unique in that it was as fast as most fighter aircraft. This was in a period when it was considered by the RAF that it was impossible for monoplane aircraft to conduct vertical bombing with any degree of success. During the war the Pe-2 was the principal dive- and light-bomber of Russia's air power across the vast Eastern Front and it continued in service until the early 1950s with the air forces of the Warsaw Pact countries and Yugoslavia. Conceived by a team of top aircraft designers whom Stalin had incarcerated in a prison camp on trumped-up political charges, the Pe-2 had originally been designed as a high-altitude twin-engine fighter plane, but, due to the outstanding success of the German Stukas in the Blitzkrieg, its role was quickly changed to that of a fast dive-bomber. The Pe-2 arrived in service around the time of the German attack on its hitherto ally. Although only a handful had reached front line units by the start of Operation Barbarossa in June 1941, the Pe-2 soon became the main dive-

bomber in both the Soviet VVS and Naval service. Mass production, by factories hastily moved back beyond the front, meant that numbers increased rapidly, and more than 11,000 of the type, including many variants, were built up to 1945. The Peshka became the mainstay of the Soviet counteroffensive that ultimately resulted in the fall of Berlin. Pe-2s also led the way in the brief but annihilating Manchurian campaign against Japan in the closing days of the war in 1945. Using official sources, including the official Pe-2 handbook, and numerous color and black-and-white photographs made available to the author from both official and private sources and collections, this book is the definitive record of the Pe-2 - the dive-bomber supreme!

*The First Team* John Lundstrom, 2013-04-11 Hailed as one of the finest examples of aviation research, this comprehensive 1984 study presents a detailed and scrupulously accurate operational history of carrier-based air warfare. From the earliest operations in the Pacific through the decisive Battle of Midway, it offers a narrative account of how ace fighter pilots like Jimmy Thach and Butch O'Hare and their skilled VF squadron mates - called the first team - amassed a remarkable combat record in the face of desperate odds. Tapping both American and Japanese sources, historian John B. Lundstrom reconstructs every significant action and places these extraordinary fighters within the context of overall carrier operations. He writes from the viewpoint of the pilots themselves, after interviewing some fifty airmen from each side, to give readers intimate details of some of the most exciting aerial engagements of the war. At the same time he assesses the role the fighter squadrons played in key actions and shows how innovations in fighter tactics and gunnery techniques were a primary reason for the reversal of American fortunes. After more than twenty years in print, the book remains the definitive account and is being published in paperback for the first time to

reach an even larger audience.

**The Japanese Aircraft Industry** ,2020-06-23 This book has been considered by academicians and scholars of great significance and value to literature. This forms a part of the knowledge base for future generations. So that the book is never forgotten we have represented this book in a print format as the same form as it was originally first published. Hence any marks or annotations seen are left intentionally to preserve its true nature.

**The US Navy in World War II** Mark Henry,2012-08-20 In 1941 the US Navy had 17 battleships of which eight would be knocked out on the first day of the war four aircraft carriers, and about 340,000 men including reservists. Pearl Harbor so weakened it that it was unable to prevent the Japanese capture of the Philippines and a vast sweep of Pacific islands. By 1945 it was the strongest navy the world had ever seen, with nearly 100 carriers, 41,000 aircraft and 3.3 million men; the unrivalled master of air-sea and amphibious operations, it was poised to invade Japan's home islands after reducing her fleet to scrap and her Pacific empire to impotence and starvation. This extraordinary story is illustrated here with dramatic photos, and nine meticulous colour plates showing a wide range of USN uniforms.

*War's End* Charles W. Sweeney,James A. Antonucci,Marion K. Antonucci,2018-09-25 On August 9, 1945, on the tiny island of Tinian in the South Pacific, a twenty-five-year-old American Army Air Corps major named Charles W. Sweeney climbed aboard a B-29 Superfortress in command of his first combat mission, one devised specifically to bring a long and terrible war to a necessary conclusion. In the belly of his bomber, Bock's Car, was a newly developed, fully armed weapon that had never been

tested in a combat situation. It was a weapon capable of a level of destruction never before dreamed of in the history of the human race, a bomb whose terrifying aftershock would ultimately determine the direction of the twentieth century and change the world forever. The last military officer to command an atomic mission, Major General Charles W. Sweeney has the unique distinction of having been an integral part of both the Hiroshima and the Nagasaki bombing runs. Now updated with a new epilogue from the co-author, his book is an extraordinary chronicle of the months of careful planning and training; the setbacks, secrecy, and snafus; and the nerve-shattering final seconds and the astonishing aftermath of what is arguably the most significant single event in modern history: the employment of an atomic weapon during wartime. ### **The Kamikazes** Charles River Charles River

Editors, 2014-07-23 \*Includes pictures \*Includes diary entries and other accounts written by kamikaze pilots \*Includes a bibliography for further reading One of the most fascinating aspects of World War II was Japan's use of suicide pilots known around the globe as kamikazes, though the Japanese referred to them as Tokubetsu kōgekitai ("Special Attack Units"). Translated as "God Wind," "Divine Wind" and "God Spirit," kamikazes would sink 47 Allied vessels and damage over 300 by the end of the war, but the rise in the use of kamikaze attacks was evidence of the loss of Japan's air superiority and its waning industrial might. This method of fighting would become more common by the time Iwo Jima was fought over in early 1945, and it was especially prevalent during the invasion of Okinawa in April 1945. The "privilege" of being selected as a kamikaze pilot played directly into the deep-seated Japanese mindset of "death before defeat." The pilot training manual assured each kamikaze candidate that when they eliminated all thoughts of life and death, fear of losing the earthly life can be easily overcome. Still, not all cases of those chosen to be kamikazes were equally noble. Recruits were trained with torturous regimens or corporal punishment, and stories of mental impairment caused by drugs or saki abound. Some were described as "tottering" and dazed, being carried to their planes by maintenance officers, and forcibly pushed in if they backed down. Pilots who could not find their targets were told to turn around and spare their own lives for another day, but if a pilot returned nine times, he was to be shot. At the moment of collision, he was instructed to keep his eyes open at all times, and to shout "Hissatsu" ("clear kill"). Altogether, nearly 4,000 kamikaze pilots died in combat between October 1944 and August 1945, and about one in seven managed to hit his target. At their peak, they did far more damage to the American Navy than did conventional air attacks, and they undoubtedly placed a

significant new obstacle in the path of the American forces slowly encircling the Japanese home islands. However, the widespread use of kamikaze tactics darkened and hardened attitudes toward Japan within the American military and helped to set the stage for the total war on Japanese civilians that the American military waged in the closing months of the war. The Marine Corps Gazette noted, "The ruthless atrocities by the Japanese throughout the war had already brought on an altered behavior (deemed so by traditional standards) by many Americans resulting in the desecration of Japanese remains, but the Japanese tactic of using the Okinawan people as human shields brought about a new aspect of terror and torment to the psychological capacity of the Americans." As one sailor aboard the USS Miami recalled about kamikaze attacks at Okinawa, They came in swarms from all directions. The barrels of our ship's guns got so hot we had to use firehoses to cool them down. The kamikazes were the most effective weapon the Japanese had in terms of sinking ships, but they only appeared in the final year of the war. The fact that Japan's military leadership concluded it was both necessary and justified to establish special units of pilots trained to sacrifice their own lives by crashing their planes into enemy vessels was a mark of their own desperation. In the heat of battle, individual soldiers occasionally risked certain or near-certain death to protect their comrades or advance their mission, but organized units devoted to suicide tactics were virtually unknown before 1944. They appeared only once the course of the war had turned decidedly against the Japanese. The Kamikazes chronicles the history of Japan's famous suicide pilots and explains when, why, and how Japan resorted to their use near the end of war. Along with pictures of important people, places, and events, you will learn about the kamikazes like never before.
