**The Mikoyan-Gurevich Mig-3 Vol. I** Dariusz Paduch, 2022-01-31 The MiG-3 fighter plane, like the history of the creation of the Mikoyan and Gurevich (Микоян и Гуревич) design bureau, is relatively well known to anyone interested in the history of Soviet aviation. Many books and articles have been published about this machine, but information about the circumstances of the birth of the project and the conditions of its creation are very brief and concise. MiG-1 and MiG-3 were the most numerous new generation fighters in Soviet aviation at the time of the German invasion of the USSR. They played a very important role in the first period of the war. Until now, it has been assumed in the literature that this applies mainly to the use of these aircraft during the battle of Moscow, as well as capital's and Leningrad's air defense, but MiGs also took on a large weight of air combat at the front in 1941.

**Linebacker II** James R. McCarthy, George B. Allison, 1979

Korean War Aces Robert F Dorr, 2013-01-20 The first virtually all-jet war, the conflict in Korea saw F-86 Sabres of the USAF take on MiG-15s of the North Korean and Chinese air forces. Although the Allied pilots were initially taken aback by the ability of the communist fighter in combat, sound training and skilful leadership soon enabled Sabre pilots to dominate the dogfights over the Yalu River. In all 39 F-86 pilots achieved ace status, and a number of these are profiled in this volume, as are notable pilots from the US Navy, Marine Corps and Royal Navy and, for the first time, the handful of MiG-15 aces.

**The Chief Culprit** Viktor Suvorov, 2013-03-15 Bestselling author Victor Suvorov probes newly released Soviet documents and reevaluates existing material to analyze Stalin's strategic design to conquer Europe and the reasons behind his controversial support for Nazi Germany. A former Soviet army intelligence officer, the author explains that Stalin's strategy leading up to World War II grew from Vladimir Lenin's belief that if World War I did not ignite the worldwide Communist revolution, then a second world war would be needed to achieve it. Stalin saw Nazi Germany as the power that would fight and weaken capitalist countries so that Soviet armies could then sweep across Europe. Suvorov reveals how Stalin conspired with German leaders to bypass the Versailles Treaty, which forbade German rearmament, and secretly trained German engineers and officers and provided bases and factories for war. He also calls attention to the 1939 nonaggression pact between the Soviet Union and Germany that allowed Hitler to proceed with his plans to invade Poland, fomenting war in Europe. Suvorov debunks the theory that Stalin was duped by Hitler and that the Soviet Union was a victim of Nazi aggression. Instead, he makes the case that Stalin neither feared Hitler nor mistakenly trusted him. Suvorov maintains that after Germany occupied Poland, defeated France, and started to prepare for an invasion of Great Britain, Hitler's intelligence services detected the Soviet Union's preparations for a major war against Germany. This detection, he argues, led to Germany's preemptive war plan and the launch of an invasion of the USSR. Stalin emerges from the pages of this book as a diabolical genius consumed by visions of a worldwide Communist revolution at any cost—a leader who wooed Hitler and Germany in his own effort to conquer the world. In contradicting traditional theories about Soviet planning,

the book is certain to provoke debate among historians throughout the world.

**Sweeping Forward** ,2013 The X-29 was an unusual aircraft with a truly unique silhouette. It combined many features that challenged the technologies of its day and represented special problems for the developers and the team of testers responsible for documenting its features and design goals. This book is a look at the big picture of what this team accomplished in a relatively fast-paced test program involving the truly unique X-29.

*The Chinese Air Force* Richard P. Hallion,Roger Cliff,Phillip C. Saunders,Center for the Study of Chinese Military Affairs (National Defense University),2012-10-03 Presents revised and edited papers from a October 2010 conference held in Taipei on the Chinese Air Force. *Red Eagles* Steve Davies,2012-01-24 When two Navy F-14 Tomcats engaged and shot down two Sukhoi Su-22 jet fighters in 1981, they drew on experience and tactics that they had learned from a previous encounter with MiG jet fighters. The difference between the two encounters was that in the first, the enemy fighters were flown by American pilots assigned to a top secret squadron hidden at a remote airfield in the ultra-secret Tonopah Nuclear Test range, Nevada. In the second, the Sukhoi fighters were flown by Libyan pilots attempting to enforce Colonel Qadaffi's 'Line of Death' over the Gulf of Sidra. From the mid-1960s until the end of the Cold War, the United States Air Force acquired and flew Russian-made MiG jets, eventually creating a secret squadron dedicated to exposing American fighter pilots to enemy MiGs. Following underperformance in the Vietnam War, the USAF began to study MiGs in order to improve fighter pilot training. This then developed into the black Constant Peg program. In this program, MiGs were secretly acquired, and made airworthy, a difficult task without manuals or parts. A secret base was found to operate the planes from; and then ace pilots were found and trained to not only fly the assets, but fly them as they were flown by America's enemies. Finally, a program of exposing American fighter pilots to the MiGs was developed. In all, more than 1,600 American fighter pilots would train against America's secret MiGs between 1974 and 1989. Uncovering the story of the secret MiGs in America during the Cold War, and specifically Constant Peg and the 4477th Test & Evaluation Squadron, is a challenge because much of the information has been destroyed, or remains classified. To piece together the story of this group of men who provided America's fighter pilots with a level of training that was the stuff of dreams, author Steve Davies has interviewed over thirty of the Red Eagle pilots, along with other members of the squadron. This paperback edition includes new material on

HAVE IDEA and other HAVE programs; making the MiGs airworthy in 1977 from the maintainers' perspective; and the intelligence activities of MiG expert at the Foreign Technology Division Mike Coyle. The result is a fascinating glimpse into a black program that enabled American fighter pilots to go into combat having already met and defeated their first MiG. Hardcover edition ISBN: 9781846033780

**F-22 Raptor** Steve Pace, 1999 Provides history on America's next generation of fighter plane, known as the F-22 Raptor.

Tupolev Tu-16 Badger Yefim Gordon, Vladimir Rigmant, 2004-06-21 The establishment of NATO posed the need for the Soviet war machine to create a fast jet bomber capable of reaching targets throughout Western Europe and combatting the carrier task forces with which the US Navy could throw its weight around the world. The basic Tu-16 which first flew in the mid-1950s was developed into nearly 50 versions adopted for various roles, including nuclear-capable bombers, anti-shipping missile strike aircraft, torpedo-bombers and minelayers, numerous reconnaissance and ECM variants, assorted development aircraft for testing new engines, avionics and systems. The Tu-16 even found civil uses as a fast mailplane and a weather research/rainmaking aircraft! The Badger, as the bomber was known to the West, served as the basis for the Soviet Union's first jet airliner, the Tu-104. The nearly 1,500 Tu-16s built in the Soviet Union were an important factor in preventing all-out military confrontation between the East and the West. Since the mid-1950s and until the 1980s the Badger has been a regular picture on the pages of the Western press, snooping around Western naval groups every now and then. The type also had its share of 'hot' wars, getting its baptism of fire in the Six-Day War of 1967. Apart from three factories in the USSR, the Tu-16 was built under license in China as the H-6 and remains in service with the People's Liberation Army Air Force. Other foreign users were Egypt, Indonesia and Iraq. All known versions are described and a full account is given of the Tu-16's operational career in the USSR and abroad during the Cold War and in the days after that when many of the surviving Badgers were used as target drones. The book features many previously unpublished photos and a detailed production list.

*The Messerschmitt Me 163 Komet* Marek Ryś, 2021-09-30 Although the German Me 163 Komet rocket fighter was created as a remedy for the mass air raids of the Allied air force on Germany, its origins date back to 1938. Alexander Lippisch then began work at the DFS factory on a tailless rocket-propelled aircraft, designated as DFS 194. At the beginnings of 1939, the project was handed over to the Messerschmitt factory and there it developed into the Me 163A. Two prototypes of this aircraft - V4 and V5 - were completed in 1941 and flown as gliders. Then the V4 received a Walter HWK R.II rocket engine with a thrust of 7.5 kN, and on October 2, 1941 H. Dittmar achieved a

speed of 1003 km/h on mentioned plane. Thirteen Me 163As were built for training.

**Flying Wings and Tailless Aircraft** Bill Rose,2010 This is an exciting new addition to the highly successful Secret Projects series, which examines some extraordinary flying wings and tailless aircraft projects. Designed and developed since the dawn of aviation, these aircraft still hold a great importance today, with many aviation enthusiasts eager to learn more about these remarkable aircraft, which provided the foundations for the modern aviation scene. Beginning with an analysis of the advantages of the flying wing, the author looks at why aerodynamicists have been attracted to this unique configuration since the earliest days of manned flight, highlighting a range of specific aircraft and relevant examples. Many aviation enthusiasts will delight in discovering the more intimate developmental details of familiar aircraft including the famous early glider Junkers and other World War 1 flying wing biplane designs.

**Falcons of France** Charles Nordhoff,2024-04-05T00:00:00Z Falcons of France -- a novel about flying, World War I, and contemporary moralities. **The Petlyakov Pe-2** Peter C Smith,2020-03-30 During the Second World War, the Soviet Union's Petlyakov Pe-2 \_Peshka\_ dive-bomber was unique in that it was as fast as most fighter aircraft. This was in a period when it was considered by the RAF that it was impossible for monoplane aircraft to conduct vertical bombing with any degree of success. During the war the Pe-2 was the principal dive- and light-bomber of Russia's air power across the vast Eastern Front and it continued in service until the early 1950s with the air forces of the Warsaw Pact countries and Yugoslavia. Conceived by a team of top aircraft designers whom Stalin had incarcerated in a prison camp on trumped-up political charges, the Pe-2 had originally been designed as a high-altitude twin-engine fighter plane, but, due to the outstanding success of the German Stukas in the Blitzkrieg, its role was quickly changed to that of a fast dive-bomber. The Pe-2 arrived in service around the time of the German attack on its hitherto ally. Although only a handful had reached front line units by the start of Operation Barbarossa in June 1941, the Pe-2 soon became the main dive-bomber in both the Soviet VVS and Naval service. Mass production, by factories hastily moved back beyond the front, meant that numbers increased rapidly, and more than 11,000 of the type, including many variants, were built up to 1945. The Peshka became the mainstay of the Soviet counteroffensive that ultimately resulted in the fall of Berlin. Pe-2s also led the way in the brief but annihilating Manchurian campaign against Japan in the closing days of the war in 1945. Using official sources, including the official Pe-2 handbook, and numerous color and black-and-white photographs made available to the author from both official and private sources and collections, this book is the definitive record of the Pe-2 - the dive-bomber supreme!

**The English Electric Lightning** Martin W. Bowman, 2018-01-30 A photo-packed history of this Cold War-era supersonic fighter aircraft. The early 1950s were a boom time for British aviation. The lessons of six years of war had been learned, and much of the research into jet engines, radar, and aerodynamics had begun to reach fruition. In Britain, jet engine technology led the world while wartime developments into swept-wing design in Germany and their transonic research program were used to give western design teams a quantum leap in aircraft technology. The English Electric Lightning emerged at this time. This supersonic fighter aircraft of the Cold War era is perhaps best remembered for its amazing takeoff performance, its exceptional rate of climb, and its immense speed. Here, Martin Bowman takes us on a photographic journey, illustrating the various landmarks of the Lightning's impressive operational history.
